## Evergreen Transplants for Lining Out

Our transplants will please you. They are growing on gravelly soil with plenty of space for development. This assures both a good top and root system. Part are from beds under irrigation. The majority, however, are from field rows.

Give us a trial order and let this stock speak for itself.

Mugho Pine

Pine Mugho (Montana Mughus) These Mugho Pine are the desirable slow growing compact type with an excellent root system. These have also been sheared. We feel qualified to name ourselves "Headquarters for Mugho Pine".

Note:—Winter color richness and unusual resistance to abuse and red spider places Mugho Pine far above Globe Arbor Vitae, etc. Why not use more of them in your plantings and have satisfied customers?

Headquarters for Mugho Pine

One of 5 large blocks of quality Mughos here at Fairview. Priced very reasonable, too.

Retinospora Decussata — Perfectly hardy. A compact slow grower with bright silvery green foliage. We find this one of the best Retinosporas, although it seems little known to the trade.

**Larch Japanese (Larix Leptoleptis).** We find this variety to be the best of all the larches.

We are long on an extra fine lot of well developed stock. Deduct \$.25 if not **B&B**.
